PROFESSIONAL SUMMARY

Computer science graduate with hands-on experience building React and TypeScript applications and REST APIs using FastAPI and PostgreSQL. Strong foundation in responsive design, API integration, and automated testing, with communication and teamwork skills developed through client projects and shift management.

EDUCATION

Point Loma Nazarene University | San Diego, CA

Bachelor of Science in Computer Science: Software Engineering | Graduated 05/2026

PROJECTS

Spotify Rewind | Next.js, React, TypeScript, Spotify Web API

- Developed a responsive Next.js and TypeScript web application integrating the Spotify Web API to authenticate users and display personalized listening insights.
- Implemented OAuth authentication, REST API integration, asynchronous data fetching, and dynamic rendering to deliver personalized user experiences.
- Built reusable React components and managed application state to display listening data across interactive views.

Job Tracker API | Python, FastAPI, PostgreSQL, GitHub Actions

- Built a REST API for tracking job applications with registration, login, and full create, read, update, and delete functionality.
- Implemented JWT authentication, Argon2 password hashing, and per-user access controls to protect application data.
- Completed 16 passing automated tests and configured GitHub Actions to run tests on pushes and pull requests.

KPI Dashboard | Angular, TypeScript, SQL, Google Sheets API

- Analyzed university data with the Director of Institutional Research and built dashboards for 10–12 metrics to reveal trends and changes across years and categories.
- Met weekly with the Director of Institutional Research via Zoom to present progress and incorporate feedback.
- Built reusable Angular components and integrated Google Sheets data to visualize multi-year trends and performance thresholds.
